SKILLS

- HTML │ CSS │ SCSS
- JavaScript
- React
- React Native │ Expo
- Python │ Django (DRF)
- JSON manipulation
- API test and development with Postman
- Git │ Github
- CLI (Powershell)
- Netlify
- AWS (Elastic Beanstalk)
- Resourceful
- Fast learner and always eager to learn more.
- Self-driven
- Independent work
- Problem-solving.

LANGUAGES

- Spanish (Native proficiency)
- English (Fluent proficiency)

HÉCTOR SÁNCHEZ
FULL-STACK SOFTWARE DEVELOPER

EXPERIENCE

Full-stack Developer and Manager

Whistle Coding LLC (SAAS startup), Oct 2021 - Present

- As back end and front end developer, I've collaborated and built multiple web and mobile applications for about 3 years, using HTML, CSS, Django, and React, ensuring high performance, responsiveness, and user-friendly interfaces.
- Collaborated on a mobile application for fitness to improve several components (React Native, Expo).
- Improved existing web applications and sites by refactoring code, enhancing functionality, and optimizing performance to meet evolving user needs and business requirements.
- Deployed Django back ends using AWS Elastic Beanstalk and configuring databases to use PostgreSQL for production environments.
- Managed front-end deployment with Netlify, streamlining the deployment process and enabling continuous integration and delivery.
- Led daily stand-ups and sprint planning sessions with the development team, clearly articulating project goals, tasks, and deadlines to ensure team alignment and productivity
- Conducted performance reviews and one-on-one meetings with team members, delivering constructive feedback and fostering an environment of continuous improvement
- Managed client concerns and resolved issues efficiently through good communication and effective problem-solving skills

Front-end Developer

Verifimint (SAAS startup), January 2023 - July 2023

- Building different interfaces and components for a web application using React and CSS for multiple pages.

A few of the projects I've worked on and continue maintaining at Whistle Coding LLC:
- Stronger KOS fitness challenge (React, CSS, Stripe integration):
  - Repo: github.com/adrianlebaron/stronger-challenge
  - Site link: kosfitness.org

One of my personal projects for a nutritionist (Next js, CSS):
- Ivan Nutritionist website:
  - Repo: github.com/Hector9923/nutriologo-ivan
  - Site link: ivannutriologo.netlify.app

EDUCATION │ COURSES

CBI (Calvary Bible Institute)

Associate Degree in Theology
Aug 2018 - Dec 2019

Bottega Tech Devcamp Full-stack development

Jan 2020 - May 2020
Instructor: Jordan Hudgens

Django with React Course

Instructors: Dennis Ivy and Brad Traversy

JavaScript Course

Instructor: Wes Bos
